

SuperOffice Analyze

Self service analytics

The solution's powerful data visualization capabilities allow the business user to view their own data in a simple and meaningful way. It meets the business users' need for ease of use and flexibility on the one hand, and IT's need for standards and control on the other.

The solution is accessible at all times through your web-browser and does not require any local client installation.

No waiting for outdated reports, no more guessing. Just fast answers to critical business questions.

Value quickly delivered

SuperOffice Analyze is a predefined analytics package with very short implementation time. Just start clicking and become instantly productive.

To some organizations, the word flexibility is important. Most of the SuperOffice 7 customers who already work with SuperOffice Analyze have found just what they are looking for in the standard solution. A few have after some time wanted more. Little by little - as their need have developed - we have met their requirements with the SuperOffice Analyze Pro version.
